

SQUEEZE IT!

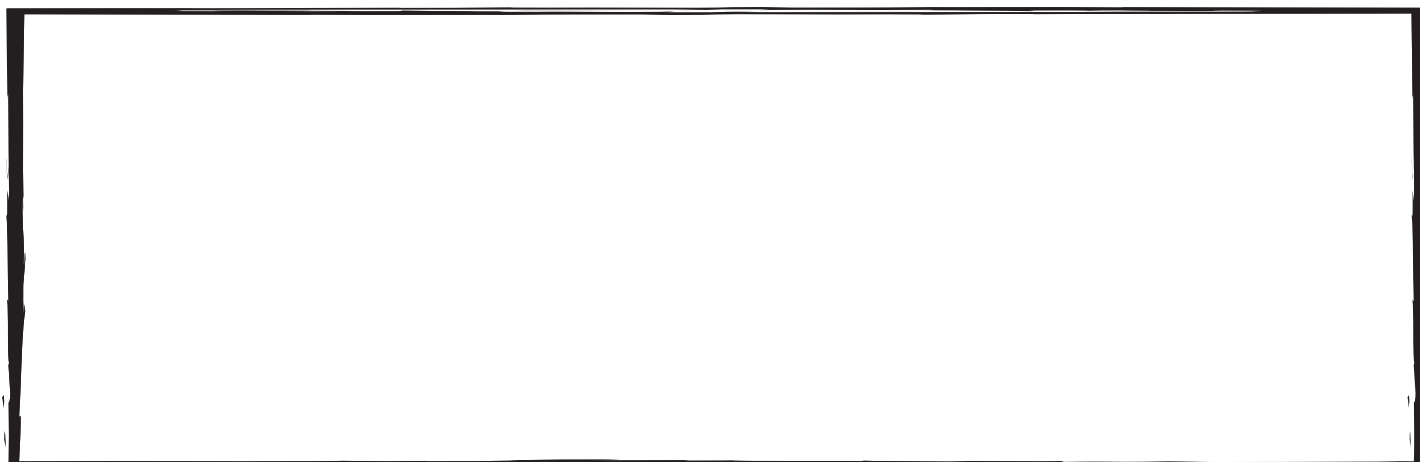

Go! Find repeating bits of text in the Original Text and write them in the Compression Chamber. Rewrite the Original Text into the Compressed Text box—but for the bits of text in the Compression Chamber, only write them out the first time they appear. Every other time they appear, draw an empty box instead of writing the bits of text. Draw an arrow from each empty box to the previous time that text appears.

ORIGINAL TEXT

COMPRESSION CHAMBER

A large, empty rectangular box with a black border, intended for writing the original text.A large, empty rectangular box with a black border, intended for writing the compression chamber.

COMPRESSED TEXT

A large, empty rectangular box with a black border, intended for writing the compressed text.
