

# TAKE OFF

**Players** One or more

**Materials** Numbers 1–9 on slips of paper

**Goal** Get the most points

- How to Play**
1. Arrange numbers 1–9 on their corresponding squares.
  2. Remove as many numbers as you can by jumping over them (with another number) into an empty space.
    - Follow the lines when jumping. For example, you might start by jumping 3 over 1 or 5 over 2.
    - You may only jump one number at a time. The empty space must be next to the number you jump.
  3. Keep going until you can't make any more jumps. Add up the face value of the cards you took to get your score.
