Stress can sometimes be a good thing because it gives you the motivation to do your best. However, it can be harmful to your mind and body. If stress continues for too long, it can cause sleeplessness, nervousness, mood swings, depression, and sickness. Here are 8 ways to deal with excess stress.

1. _____

By doing this you will feel in control. Decide which things are more urgent and important. Make lists and schedules to plan how you will get everything done. Feeling prepared can get rid of a lot of stress.

2. _____

Instead of worrying about doing something or avoiding it because you are scared, just do it! The sooner you take action, the more time you will have if anything goes wrong.

3. _____

Keeping your body healthy reduces stress. Cut down on too much caffeine and sweet things. Make sure you get enough sleep and vitamin C.

4. _____

Deep breathing relaxes you because it gets more oxygen into your body. Try breathing in deeply through your nose then exhaling through your mouth. Repeat ten times.

5. _____

Doing something you really enjoy means you get a chance to take a break. People who don't do this feel depressed. Their problems seem bigger.

6. _____

If you think negatively, stress can take over. Remind yourself that you can do it. When you believe in yourself, stress often goes away.

7. _____

You can't change things so why worry? Work on the things you can do something about.

8. _____

Telling people about your problems can often help. This way you will feel less alone. You should also tell people such as teachers or friends or parents how stressed you feel about certain things. Once they realize how you feel, they might be able to help.
