

# ADD UP

**Players** Two or more

**Materials** Deck of 36 cards made up of four each of cards ace (or 1) through 9 (four sets of 1–9)

**Goal** Get the most cards

- How to Play**
1. Put the deck FACE DOWN on the table.
  2. Player 1 takes two cards, adds the numbers, and says it aloud.
  3. Player 2 takes two cards and says the sum.
  4. The player with the highest point sum wins the round and takes all four cards.
  5. If the sums are equal, do another round to break the tie. The winner takes all of the cards.
  6. When the cards run out, the person with the most cards wins.

**Ratchet it up** Multiply the numbers instead of adding them.

**Variation** Each player picks two cards and looks at them (without showing the other), then swaps one with the other player (each player **MUST** trade a card). These become the cards that are summed for each round.
